About

With +20 years experience, I design, develop, and maintain websites that:

- Look great & function on mobile phones.
- Communicate impact.
- Build an email list.
- Book appointments.
- Accept online applications.
- Sell stuff.
- Can be self-managed.

Methodology

I use a 4-phase process:

- Define
- Design
- Develop
- Deploy

Define: Ask questions. Research. Define & document requirements. Plan integrations. Create a Site Map. SEO keyword research.

Design: Map user flows. Develop wireframes & page designs. Write content.

Develop: Create the site. Configure site features. Build forms & pages. Setup integrations. Load content.

Deploy: Test. Configure custom domain DNS. Launch the site.

Technology

I build websites that my clients own and have control over.

I build websites powered by WordPress.

43% of all websites use WordPress. WordPress is open source software... which means you own it. WordPress is portable which means you can host it anywhere you choose.

More than 500 million WordPress websites, 70,000+ plugins and 30,000+ themes make WordPress a large global platform.

WordPress has a large and growing community of Developers and Designers.

I use a proven recipe of WordPress plugins and themes to build full-featured websites that are fast, mobile responsive, search optimized, and fully customizable.

Services

My services include:

- Website Design + Development
- Website Maintenance
- Content Migration
- Content Planning
